www.cloud-computing-training.in

Cloud computing as an alternative way of using information technology.

These reasons may well change the role of IT in the near future, and some of IT's traditional service delivery models and organizational structures will need to be changed to accommodate the power of computing that can be easily deployed through cloud computing.

Trainings Offered

Cloud Computing Training

- Basic - Intermediate Level
- Intermediate - Advanced Level

Cloud Computing - Security

VMware Cloud Computing

Amazon Web Services Training

Private Cloud Training

Virtualization Training

- VMware ESX Server
- XEN Hypervisor
- KVM Virtualization

Amazon Web Services Training

Amazon Web Services (AWS) provides a comprehensive range of IT cloud products that allows organisations to access reliable and scalable computing resources. In this course, you gain the skills needed to fully leverage AWS to deliver significant technical and business benefits.

1

Classroom Training

Get the high demand Cloud Computing Training from Corporate Experts with interactive classroom sessions.

2

Online Training

We have Online Training, in addition to Classroom Training - to enable Remote / Overseas learning. On-line training – **anytime anywhere learning!**

3

Corporate Training

Get the high demand Cloud Computing Training delivered through Corporate Training, crafted based on Client Requirements.

Why Knowledge Labs?

- Training by highly experienced and Certified Corporate Professionals.
- Structured Course Materials.
- Exhaustive, systematic step-by-sep lab exercises.
- Online Assesment Tests
- Cloud Scenarios + Real-time projects & hands on best practices
- Placement Assistance
- Cloud Certification
